Education

Computer Science Degree

UNIVERSIDAD AUTÓNOMA DE SANTO DOMINGO
2013 Amin Abel Award Winner
2011 - 2016

English

UNIVERSIDAD APEC
2012 - 2015

Linux SysAdmin / Oracle DBA

Fundación Código Libre Dominicana
2013 - 2013

Technician-Professional in Computer Scienc

POLITÉCNICO MÁXIMO GÓMEZ
2007 - 2009

Skill

- Typescript
- Node
- GO
- PHP / Laravel
- ReactJs / NextJS / VueJs
- HTML / CSS
- SQL (Mysql, Postgres, Redshift)
- Bash
- AWS
- Pulumi
- Terraform

Narciso Núñez

Software Engineer

About

Full Stack Web Developer with more than 12 years of experience with Backend Technologies and knowledge in Mobile development. Having at least 5 years of Database Administration experience with RDBMS like Oracle, MySQL, MariaDB, Postgres and Document oriented like MongoDB.

Also, I have been working with Frontend technologies the last couple years specially with JavaScript, ReactJs and VueJS. The last couple years of my professional path has been moving more related to the development team management (also coding). Lover of the open-source communities and projects.

Experience

Senior Software Engineer | 2023-2024

Every, Inc. | Remote

Every is a single product startup and because of that you need to be involved in every aspect of the product. However, my focus inside the team was to implement the integrations with third party APIs related to the banking module. Handling investments, positions, trades, payments, etc.

Also, good part of my day to day work was creating internal tools for the managment team to work with using Retool.

Technologies we used are: GraphQL, Hasura, Retool, NextJs/React, Node, AWS, Terraform, NX and many more

Director of Development / CTO | 2022 - 2023

TashiPro | Remote

I was responsible to make sure the team have everything they need to be set for success. I was more involve in the decision making process for the future of the product and making sure clients are happy.

At this point, we started migrating the platform using NodeJs + Typescript + NX to manage the mono rep, Pulumi to write our infrastructure. NextJs and many more new/solid technologies

Backend Team Lead | 2021 - 2022

TashiPro | Remote

I started as a Backend Team Lead working directly with people in different countries (India, Pakistan, Spain and Dominican Republic). We used a lot of AWS services with the serverless architecture. We define all the architecture using sam framework for Cloud Formation. The main technologies are: NodeJS, ReactJs .

Other services we used are:SQS - SNS - Redshift - Secret Manager - Parameter Store - API Gateway - Lambda - DynamoDB - EC2 - S3 - Cognito - VPC - OpenSearch - Amplify - Route 53 - and a lot more.

Software Engineer

Experience

Director Of Development | 2022-2022

CreateApe | Remote

As a Director of Development I was handling a development team of 17 devs from all over the world. I was responsible of creating estimations and timelines for our clients and make sure we deliver on time and with good quality.

One of my main responsibilities was checking clients' requirements and selecting the right technologies to complete the development process. As part of the leadership team, I created processes to make the development workflow easier and improve client communication with the development team.

Senior Software Engineer / Team Lead | 2020 - 2022

TashiPro | Remote

I'm in charge of supervising the whole development team across the world. One of my main responsibilities is always having the resources for the upcoming projects and keep them inside the budget and milestones.

As part of my role, I also like mentoring my developers, manage client servers and do A LOT of meetings with client when they have any technical questions.

Software Engineer | 2018 - 2020

Vivial | Office

As part of the Vivial Engineering department, my role as a developer inside the team is to maintain and develop new features for the current php/drupal platform. My focus is oriented to the social network aspect of the system being in charge of Facebook / Facebook Ads and LinkedIn networks functionality.

Also, as a Senior member of the team I help new team members to get up to speed with the system as soon as possible. Right now, we are in a migration process to move the whole current platform to a new one using Node, React, PostgreSQL, AWS, etc. At this point, I'm helping with the design and research to migrate the modules the least painful as possible and almost full-time developing services in Node Js.

Senior Backend Developer | 2017 - 2018

Theorem | Office

Maintaining an existing CodeIgniter project, fixing any error and adding the missing core functionalities required by the company.

Main Developer / Team Lead of the development team in charges of create the new internals tools. Everest, one single application that manages all the production processes and clients' processes
